

# WJ530

## Triple Printhead Power Setting a New Efficiency Benchmark

Faster Speed and Consistent Precision for  
Jewelry Wax Pattern Production

### Ultra-High Efficiency

Multiple printheads  
Production efficiency doubled

### Exceptional Precision

Precision optimized  
Superior detail representation

### Stable & Durable

Patented self-developed  
wax circulation control system  
Reliable and durable

### High Wax Material Utilization Rate

Stable output  
Wax material utilization rate  
to 58%-60%

### Intelligent Monitoring

Built-in camera  
Print progress visible in real time

# WJ530

Breakthrough in Efficiency and Precision

## Ultra-High Efficiency

Print 1 inch (2.54cm) in just 4 hours  
10-12kg/month per unit, delivering rapid printing  
Easily meet peak-season order demands

## Exceptional Precision

Ultra-thin layer thickness of 15μm  
High resolution of 2900×2900×1700 DPI  
Reduce polishing costs by 25%-33%

## Stable & Durable

Patented self-developed  
wax circulation control system

## High Wax Material Utilization Rate

Stable output with a wax material utilization  
rate of 58%-60%, advanced technology and  
reliable printing improve utilization, reduce  
waste, and maximize production efficiency.

## Intelligent Monitoring

Wi-Fi connectivity & 2K HD camera,  
Monitor printing in real time for  
worry-free production

# New Jewelry Techniques – Hard Gold Plating & Gold Vermeil

## ■ Hard Gold Plating | From WJ530-Printed Wax Patterns to Durable Jewelry

WJ530's ultra-thin layer thickness and ultra-high precision achieve precise details of wax patterns, providing a perfect electroplating foundation for hard gold plating.

## ■ Hard Gold Plating | From WJ530-Printed Wax Patterns to Durable Jewelry

WJ530's multi-printhead system speeds up wax pattern production while ensuring consistency in silver cores, significantly boosting the efficiency of gold vermeil jewelry batch production.

# Broaden Applications in Jewelry Manufacturing

**Mass Production**

Running 24 hours daily, 7 days a week, a single WJ530 yields 10–12kg of red wax patterns monthly, effortlessly fulfilling bulk factory orders.

**Small Batch Customization**

Its multi-printhead system and 2900x2900x1700 DPI ultra-high resolution offer precision and flexibility, meeting customized demands.

## WJ530 Specifications

Printing Technology	MultiJet Printing (MJP)
Build Volume	289*208*150mm
Number of Printheads	3 piezoelectric printheads
Dimensional Accuracy	20mm ±0.04mm
Resolution	2900*2900*1700 DPI; layer thickness: 15μm
Material Utilization	Part wax utilization ≥ 55%
Print Speed	≥ 5.5mm/h with layer thickness of 15μm
Slicing Software	WaxJetprint
Supported Input Formats	stl, slc
Connectivity	Network 10/100/1000 Ethernet/USB/Wi-Fi
Supported Operating Systems	Windows 7 / Windows 10 (64bit)
Operating Environment	Temperature: 18–26°C; humidity: 30–70%
Equipment Dimensions	1352*775*1600mm
Equipment Weight	480kg
Packaging Dimensions	1530*900*1837mm
Packaging Weight	630kg

## Wax Specifications

Material Name	FFWJ1200	FFMS3200
Material Type	Part material	Support material
Net Weight	3.0kg/bottle	3.6kg/bottle
Composition	100% wax	Wax support material
Color	Red	White
Density@90°C (liquid)	0.79	0.85
Melting Point	68°C	55°C
Softening Point	63°C	/
Volumetric Shrinkage	1.1%	/
Linear Shrinkage	0.7%	/
Needle Penetration	9	/
Ash Content	<0.01%	/
Description	High-precision castable wax material	Hands-free dissolvable support material
